

Windy Bat kite

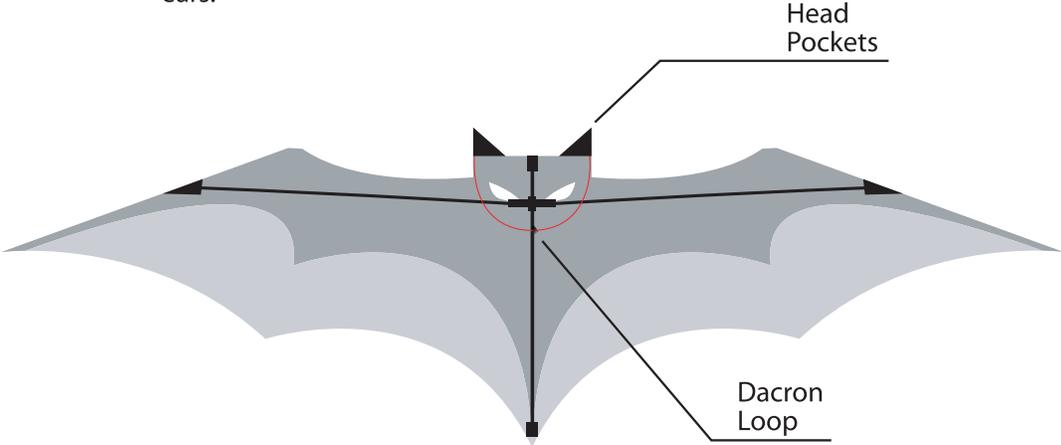

— x 2 (top spreaders)

— x 1 (head spar)

1. Take one of the two thick Spreader and insert it into the pockets, then into the Dihedral. Make sure the Dihedral is flipped so the wings are swept back. Repeat for opposite Spreader.

2. Take the thinner spar and insert it into the Dacron Loop that's already sewn onto the kite and located just under the Spine. Then insert the thin spar into the Head Pockets located in the ears.

3. Attach your Flying Line to the Bridle Ring.
